

March 13-15, 2024

Mathematics and Its Historiography in the Long Twentieth Century:

Circulations and Interactions

Wednesday, March 13

13:30-14:00 Coffee and opening remarks

Session 1

14:00-14:45 **Nicolas Michel** (Bergische Universität Wuppertal)
Intuition, Cognition, Symbolization: H.G. Zeuthen on the Emergence of Geometrical Knowledge

14:45-15:30 **Ivahn Smadja** (Nantes Université - Institut Universitaire de France)
Reworking Hypotheses into New Ones: Zeuthen, Hankel and Fin-de-siècle Historiography of Ancient Mathematics

Coffee break

16:15-17:00 **Christopher Hollings** (University of Oxford)
Presenting Ancient Egypt to Mathematicians: A 1926 Lecture by Otto Neugebauer

17:00-17:45 **Helena Durnová** (Masarykova univerzita)
History of Mathematics in Czechoslovakia 1918-1968 and the Role of Quido Vetter

Thursday, March 14

Session 2

E.A. Hunter (University of Chicago) 09:00-09:45
Anachronistic Point: Archimedes in Dijksterhuis' and Koyré's Scientific Revolution

Thomas Berthod (SPHERE, Université Paris-Cité) 09:45-10:30
History of Mathematics and Philosophy, Two Disciplines Which Work Well Together? The Example of Suzanne Bachelard's "Epistemological History"

Coffee break

Marieke Gelderblom (Universiteit Utrecht) 11:15-12:00
Historicizing Statistical Graphics

Hans Fischer (independent scholar) 12:00-12:45
Probabilists and Statisticians as Historians of Stochastics in the 20th Century: Motivations and Trends

Lunch break

Session 3

Maria Remenyi (Bergische Universität Wuppertal) 14:30-15:15
History of Mathematics in Oberwolfach, 1945-1960

Philip Beeley (University of Oxford) 15:15-16:00
In Search of Method. The Post-war German Discussion on Approaches to and Objectives of the History of Mathematics

Coffee break

Moritz Epple (Goethe-Universität Frankfurt) 16:45-17:30
Spengler, Anti-Spengler, and Frankfurt's „Mathematisch-Historisches Seminar“

Friday, March 15

Session 4

09:00-09:45 **Ralf Krömer** (Bergische Universität Wuppertal)
The Association Internationale Des Académies and the Project of a Leibniz Edition

09:45-10:30 **June Barrow-Green** (Open University, Milton Keynes)
Writing The History of Mathematics: A Source-Based Approach—Priorities and Constraints, and the Value of Co-operation

Coffee break

11:15-12:00 **Christophe Eckes** (AHP, Université de Lorraine)
Bourbaki's Historical Notes Revisited

12:00-12:45 **Volker Remmert** (Bergische Universität Wuppertal)
Historicizing the Classification of Finite Simple Groups, 1970s Onward

Closing remarks, lunch break, and end of the workshop!

Location

Glanzstoffhaus
Kasinostraße 19-21,
42103 Wuppertal

Organizers

Ralf Krömer, Nicolas Michel,
Thomas Morel, Volker Remmert

Bergische Universität Wuppertal

Graduiertenkolleg 2696
Transformationen von Wissenschaft
und Technik seit 1800
